GUIDE FOR USERS OF THE HANSARD INDEX

The *Hansard* index provides page references to the official record of debates of the Legislative Assembly. Entries fall into one of three categories: subject, speaker or House business. Subject headings reflect the topics discussed by members; speaker headings begin with the member's name and are followed by the subjects spoken on by that member or comments made about the member; and House business headings represent the routine and other business of the Legislative Assembly (see list below). Entries under speakers' names may be less specific than entries under subject headings; we may group similar topics under a general heading, using words like "issues" or "operations." For a more extensive breakdown of a member's debate on a topic, see the main subject heading.

The introduction of guests and visitors is not indexed. However, *Hansard*, as well as the indexes, can be word-searched electronically from the Hansard web site (<http://www.legis.gov.bc.ca/hansard/search>). The indexes themselves can be linked to from <http://www.legis.gov.bc.ca/hansard>. The page references within the indexes are linked to the *Hansard* text.

Budget estimates are listed according to the name of the ministry (e.g., Forests, Ministry of), legislative officer (e.g., Auditor general) or agency (e.g., Elections B.C.).

The records of how Members of the Legislative Assembly (MLAs) voted in standing votes are provided in a separate index on the Internet, headed "**Voting Records by Member (Standing votes)**," and as an appendix to the printed index. These recorded divisions are listed in the index with their page references, under the heading **Divisions, Recorded**.
