GUIDE FOR USERS OF THE HANSARD INDEX

The *Hansard* index provides page references to the official record of debates of the Legislative Assembly. Entries fall into one of three categories: subject, speaker or House business. Subject headings reflect the topics discussed by members; speaker headings begin with the member's name and are followed by the subjects spoken on by that member or comments made about the member; and House business headings represent the routine and other business of the Legislative Assembly (see list below). Entries under speakers' names may be less specific than entries under subject headings; we may group similar topics under a general heading, using words like "issues" or "operations." For a more extensive breakdown of a member's debate on a topic, see the main subject heading.

The introduction of guests and visitors is not indexed. However, *Hansard*, as well as the indexes, can be word-searched electronically from the Hansard web site (<http://www.leg.bc.ca/hansard/search>). The indexes themselves can be reached to from <http://www.leg.bc.ca/hansard>. The page references within the indexes link to the *Hansard* text.
